Profile

As a MERN stack developer Developing and maintaining web applications using MERN stack technologies.Collaborating with the development team to design efficient and reusable code.Debugging issues and fixing bugs in existing applications. Building responsive front-end web interfaces using React.js.Creating and connecting to RESTful APIs using Node.js and Express.js.Designing and implementing database schemas and managing data using MongoDB.

Professional Experience

Test engineer, Indium Software

2022 Feb – present

Indium is an digital engineering company Build modern solution across application, data and gaming Working in a CI CD project flow

Chennai

Skills

- Html , CSS
- React JS
- Express JS
- Git , GitHub
- Tailwind Css , Bootstrap
- Agile development methodologie
- Postman
- Javascript
- Node JS
- Mongo DB , MySql
- Core Java
- material UI, Antd design
- Angular JS ,Typescript (Beginner)
- Redux Toolkit

Projects

Event Management Application, EventmanagementApp help us to find various vendor details like catering, DJ , photography, decoration all at one place ☑

- Designed and developed a full-stack web application using the MERN MongoDB, Express.js, React.js, Node.js) stack.
- Utilized React.js to create a dynamic and responsive user interface, incorporating features such as vendor listing, search functionality, Booking availability, and user authentication
- Built RESTful APIs using Node.js and Express.js for handling HTTP requests and interacting with the MongoDB database. Implemented features like user authentication, vendor management, and booking processing
- Designed and implemented MongoDB schemas to efficiently store and retrieve vendor data, user information, and booking Details

Online Supplement Application, Developed and deployed a full-stack online supplement store application designed to streamline the purchasing process for health supplements ☑

- Designed and developed a full-stack web application using the MERN MongoDB, Express.js, React.js, Node.js) stack.
- Utilized React.js and Tailwind Css to create dynamic and responsive user interface, Includes features such as Product Listing, search Products , Cart , checkout , Shipping details updation
- Implemented RESTful APIs in Node.js and Express.js to handle product data, user authentication, and order management
- Managed the database using MongoDB, ensuring efficient data storage and retrieval for large datasets.
- Configured secure payment processing with Stripe and validated transactions on the server side
- Designed an admin interface for managing products, monitor and track orders

Library Admin dashboard, This Dashboard help us maintain all books and student datas ☑

- Designed an intuitive user interface allowing librarians to efficiently handle book cataloguing, borrower information, and transactional records.
- Leveraged Angular to create modular and responsive components, ensuring a seamless user experience
- Used Firebase for Backend operations to perform CRUD operations on book data, maintaining consistency and integrity in the library database
- Implement the Authentication for Authorized users to enter and maintain JWT for session breaks

Employee management Portal, Created an MERN stack RBAC based CRUD operation project ☑

- Designed and created with React JS ,flowbite and Antd
- Built RESTful APIs using Node.js and Express.js to handle user authentication, task CRUD operations . Utilized MongoDB as the database to store task data efficiently
- Define different user roles (e.g., Admin, User) with varying levels of access to resources.
- Dynamically load and assign user roles after authentication.

Room booking API, Room Booking API Designed and created in NODE JS

- Designed the architecture of the API, including endpoints, request/response schemas, and database schema using industry best practices and architectural patterns like MVC Model-View-Controller).
- Implemented the backend logic using Node.js and Express.js, utilizing MongoDB as the database to store room data, reservation details, and user information. Developed CRUD Create, Read, Update, Delete) operations for rooms and reservations.
- Implemented input validation and error handling to ensure data integrity and provide informative error messages to clients, enhancing the reliability and usability of the API.

Education

BSC computer science, Alpha arts and science college
GPA 6.5 /10

2016 – 2019
chennai, Tamilnadu

Biology, Government hr sec school
GPA 7.5 /10

2014 – 2016

Courses

MERN stack development, Guvi

2024 Mar – 2024 Nov
chennai

Javascript fundamentals, Udemy

2023 Dec – 2023 Dec
chennai
